

Q.

Self Introduction.

Page No.	
Date	

Good Morning ! & thank you for giving me the opportunity to introduce myself.

My name is Ankit Pooar & I recently completed my Bachelor of Engineering in Comp. Eng. from SPPU.

During my academic journey, I developed strong interest in MERN Stack development.

I have hands on experience with language like C++, Python, SQL.

~~I also worked on a Project related to AI related - - - work - - - which helped me develop skills~~

I also worked on Projects like - - - - -

These Projects helped me strengthen my Problem Solving skills & understand real world app.

I also completed Internship

I also worked on research paper.

introduction

Page No.	1102		
Date			

I'm a quick learner and team player
& always eager to take on new
challenges.

I am excited about the opportunity
to start my professional journey &
contribute to your organization.

During my academic journey,
I have developed a strong interest in
blockchain development.

I have hands on experience with
Python, JavaScript, and Solidity.

Q. Why do you want to work for our company?

I have been following your [company name] for several years & more always been impressed by your innovative approach. Your recent project on XY [recent pr.] particulars caught my attention.

Before coming here I read the Job Description throughly.

I want this job b'coz it is a role that is perfect fit for my qualifs & knowledge, & it is in an industry I am passionate about.

Also I researched you before applying & I respect your company culture & how you support your employees so they can reach their full potential.

I am genuinely excited about the opportunity to bring my skills & experience to [company name] & contribute to your team.

I am confident ~~to bring~~ that my BG & passion align well with the goals of your company. And I look forward to the possibility of growing with you.

Q. Why Should we hire you?

Sir, I believe I'm a great fit for this role. I'm self motivated person and give my 100% to any task that is given to me. That's why I've been able to do good with my academics. And surely I will do the same for any project that is given to me in the company. I also work well both as an individual contributor and a team member. That is why I have multiple solo and team projects.

Overall, I believe I can contribute a lot to the organization with my skill & will.

During my academic projects, I have gained hands-on experience in Mem stack.

I am genuinely passionate about technology & problem-solving, and I'm eager to contribute to your team by applying the knowledge & skills I've acquired.

Q.

Where do you see yourself in 5 years?

In the next 5 years, I see myself as a confident & skilled professional. I want to learn as much as I can, grow in my role & take on more responsibilities.

I hope to work on interesting projects, improve my technical skills, & maybe lead a small team.

I want to keep learning & be a valuable part of company's success.

I want to continuously learn, adapt & align my growth with company's vision, contributing to both technical & business goals.

Q What is your biggest strength & weakness?

My strength

My biggest strength is that I am a quick learner & always ready to adapt whenever I face something new. I put in the effort to understand it & apply it well. I also stay calm under pressure & try to find solⁿ instead of getting stressed about it.

Example of my life is giving a presentation to friends & classmates & even strangers. I don't get nervous. I take a deep breath & go through the presentation smoothly.

(i) Teamwork

(ii) Time management

(iii) Problem solving

(iv) focused writing

(v) Flexible & Versatile

• Weakness,

Public Speaking makes me nervous

Although I don't need public speaking for my role as a software engineer, but I still think it's an imp skill, especially when I want to, offer up my opinion in meetings or group discussion.

To tackle this, I've started practicing regularly. I take small steps like speaking up in team meetings, giving short presentation to friends & classmates & even recording myself to improve my confidence & clarity.

Other :

- (i) Lack of patience
- (ii) Overload of criticism
- (iii) Talkative
- (iv) Micromanager
- (v) Perfectionism.

9.

Tell me about a time
you showed leadership.

Page No.	
Date	

In my final year project, we were building a web app as a team of four.

At one point, we got stuck b'coz two members didn't agree on how to structure the backend. The team was confused & progress has stopped.

I took the lead by first setting up a short meeting where everyone could share their ideas. I listened carefully to both sides & then we find soln for this. I

This helped the team work better together, & we finished project on time.

I learned that leadership is not just about giving orders but about listening, solving conflicts & helping team stay focused.

Q

Tell me about a time

you	when	we
Date		

 successful on team

Q.

During my final year of college.

I worked on final year team project

to develop a web application. We

were a group of 4, & I was respon-

sible for the frontend develop using

ReactJS, NextJS.

At the start, we faced some confusion

about roles & timeline. I suggested

we use a Google Sheet to track

our progress & divide tasks clearly based

on strengths. I also helped one of

my teammates who was struggling with

API integration.

Because we worked well together,

supported each other & followed a clear

plan, we completed the project within time.

This experience taught me the importance of teamwork, Commⁿ & helping others for the success of whole team.

Interview

Q.

What are your salary expectations?

Page No.	
Date	

Thanks for asking this questions. Since I want to make sure we're in alignment on salary. What salary range do you typically pay other entry level candidates with similar education & skills?

Interviewer:

Well Diksha, I believe a salary betⁿ 30,000 - 35,000 per month is good number! What do you think?

Sir / Ma'am with all due respect according to the market research & my skills could we move this to somewhere betⁿ 36,000 - 39,000 per month.

I believe this would be a fair salary range keeping in mind my qualifications for this job.

I can assure you, that I will prove to be an asset to this company from day one.

Q. Tell me about a time you had to manage conflicting priorities.

In my final year of college I had to work on my final year project, prepare for placement exams, & complete college assignments - all at the same time.

I was a bit stressed b'coz everything had similar deadlines.

So, I made a to-do list and planned my time. I finished small tasks first, so I could focus more on project & placement prep.

I also used a calendar to stay on track.

This helped me finish all the work on time.

I learned how to stay organized & handle many things without getting too stressed.

Q.

What do you like to do outside of work?

Page No.

Date

Thanks for asking this question
since I want to make sure we're
in alignment on salary. What salary
range do you typically pay other
entry level candidates with similar
education & skills?

Well Dipak, I believe a salary
of 30,000 - 32,000 per month is
good number! What do you think?

Great! I'm in line with all due respect
according to the market research &
my skills would be 32,000 - 34,000
somewhere in between.

Q. Describe your leadership style.

My leadership style is collaborative & supportive. I believe in leading by example, communicating clearly, and helping the team stay focused on shared goals.

For example, in my final year project, I helped divide the work among our team based on everyone's strengths. When challenges came up - like integrating the backend - I coordinated extra sessions, researched solutions, & supported the team to keep us on track.

Q.

Tell me about a time you failed or made a mistake.

Page No.	
Date	

Q

Once during a college project, I was in charge of connecting the frontend & backend.

I thought it would be easy, so I started it late. But it turned out to be more difficult than I expected, & we missed our internal deadline.

I told my team about the mistake, worked extra hours to fix it, and finally got it working.

I learned that I should never delay an imp task & always plan better. Now, I always start early & make plan better.

9 Tell me about a time you worked with a difficult person.

Page No.	
Date	

During a group project in college, one team member wasn't participating much or completing tasks on time. It affected our progress.

Instead of arguing, I decided to talk to him politely & asked if he was facing any issues.

He said he was struggling to understand some parts of the project.

So, I helped him out & explained the steps step by step.

After that, he became more active & contributed better.

Q.

Tell me about a time you created a goal & achieved it.

Page No.	
Date	

Q.

I set a goal to build a complete web app on my own to improve my full stack develop skills. I wanted to learn how to connect frontend & backend properly & deploy it online. I planned out the features, set a timeline & used React for frontend & Node.js for backend.

I faced some challenges, especially during deployment. I used online resources & solved the issues one by one.

In the end, I completed the project, deployed it successfully & also add in portfolio.

Q. Tell me about a time you had to handle pressure.

Page No.	
Date	

During my final year pr, we were close to deadline & some parts of the project were still not working properly. Our team was under a lot of pressure to finish everything on time.

Instead of panicking, I stayed calm & focused on fixing one issue at a time. We worked as a team & supported each other.

In the end, we completed the project & submitted it on time.

Q. Do you have any questions for me?

Page No.	
Date	

Q. Can you please tell me more about the company culture?

Q. What can I do to impress myself better for this job if I get selected?

Q. What do you like the most about working in this organization?

Q. Can you please share the day to day responsibilities of this position?

Q. What are your expectations from a new hire for this position?

Q. How does the team celebrate wins - big or small?

Q

Tell me how you will handle it if a project priorities are suddenly changed

If a project's priorities suddenly changed, I would first stay calm & not get stressed. I'll try to clearly understand the new priorities by discussing with my manager or team lead.

Then I would re-organize my tasks based on the updated requirements & make sure I am focusing on the most important work first.

Since I am fresher, I would also ask for guidance whenever needed to ensure I am aligning with team goals.

Q.

How did you handle disagreement with your manager?

Page No.	
Date	

Q.

As a fresher, I haven't had much experience directly disagreeing with my manager, but I believe the best way to handle such situations is through respectful communication.

If I ever disagree, I would first try to understand their point of view completely. Then I would politely share my perspective with proper reasoning.

If my manager still decides differently, I would respect their decision because they have more experience & I would focus on delivering my best according to the direction given. At the same time, I'd treat it as a learning opportunity.

Q. Will you lie for the company under any circumstances?

I believe honesty & transparency are very imp in building trust with clients, teammates & company itself. I would not lie in ways that could harm the company's reputation or mislead stakeholders.

However, I do understand that sometimes is confidential & in such cases, instead of lying, I would handle it professionally by communicating in appropriate manner.

Q. What would you do if you were working under a bad boss?

If I ever had to work under a difficult boss, I would first try to understand their expectations & adapt my way of working accordingly.

I would focus on maintaining professionalism, completing my tasks on time, & not letting personal feelings affect my work.

If I faced a challenge, I would try to communicate respectfully to clear misunderstandings.

My main goal would be to stay free, keep learning & ensure that my work contributes to the team & the company.

Q. How will You Contribute
to Our Company?

Page No.	
Date	

I will contribute to the company
by working honestly & responsibility.
I will follow company rules and
complete my work on time. I am
always ready to learn new skills
& improve myself.

I will listen carefully to instruction
& try to perform my duties properly.
I will work positively with my team
members & support them whenever
needed. I believe my dedication &
willingness to learn will help the
company achieve its goals.

Q

Why should we give you a chance as a fresher?

Page No.	
Date	

As a fresher, I bring enthusiasm, dedication & a strong willingness to learn. I am open to guidance & always ready to improve myself. I take my responsibilities seriously & try to give my best in every task. I listen carefully, follow instructions, & work with a positive attitude. I believe that my honesty, hard work, & learning mindset make me a suitable candidate who can grow & contribute to organization.

Q What Skills Do You
Want to Improve?

Page No.	
Date	

I want to improve my commⁿ skills & professional skills. I believe good commⁿ is imp for teamwork & growth.

I also want to improve my technical knowledge related to my field. I am always ready to learn new things & improve / upgrade my skills.

Q How do you Handle Failure?

I see failure as a learning opportunity. When I face failure, I try to understand my mistakes & improve myself. I do not lose motivation. Instead, I stay true & focus on doing better next time.

I believe failures help us become stronger & more experienced. By learning from my mistakes, I try to improve my performance & move forward with confidence.

Q. What Have You learned from Your Education?

My education has taught me discipline, time management, & responsibility. It helped me build basic knowledge & problem-solving skills.

I learned the importance of teamwork, communication & continuous learning.

Education also taught me how to handle challenges & stay focused on my goals. These learnings have prepared me to face professional responsibilities with confidence & a positive attitude.

Q

How Do You Manage
Your time ?

Page No.	
Date	

I managed my time by planning my task properly. I set priorities & try to complete important work first. I make a single schedule & follow it regularly. I avoid wasting time & focus on my responsibilities.

By managing my time well, I am able to complete my work on time & maintain good quality.

Q Are you willing to learn New things?

Page No.	
Date	

Yes, I am always willing to learn new things. I believe learning helps us grow personally & professionally. I am open to new ideas & ready to accept guidance from seniors. I see every new task as an opportunity to improve my skills.

My willingness to learn helps me adapt easily & perform better in a professional environment.
